

National Fire Plan

Managing the Impact of Wildfires on the Communities and the Environment

FY 2002 Programs in Maryland

In August 2000, the President directed the Secretaries of Agriculture and the Interior to develop a plan to respond to severe wildland fires, reduce their impacts on rural communities, and assure sufficient firefighting capacity in the future. The National Fire Plan (NFP) was developed and addresses 5 key points:

- Firefighting;
- Rehabilitation and Restoration;
- Hazardous Fuel Reduction;
- Community Assistance; and,
- Accountability.

The USDA Forest Service and Department of the Interior are in the second year of implementing the National Fire Plan, with allocations to Maryland estimated at:

USDA Forest Service Allocations for FY 2002

Firefighting		Rehab and Restoration	Hazard Fuel Treatment	Research R&D JFSP	Forest Health Projects	Community Assistance			Total
Preparedness	Facilities					State Fire Assist	Volunteer Fire Assist	Economic Action Programs	
0	0	0	0	0	0	702,116	150,957	0	853,073

*Allocations for FY 2001 and 2002 may vary slightly over time due to adjustments in accounting systems.

Department of the Interior Allocations for FY 2002

Firefighting		Rehab and Restoration	Hazard Fuel Treatment	Research JFSP	Community Assistance Rural Fire Assist	Total
Preparedness	Facilities					
350,000	0	0	161,000	0	0	511,000

Program Highlights

- Cooperative Fire Protection: The State of Maryland assisted the Middle Atlantic States with completing a GIS Wildland Fire Assessment that will be used for Fire Planning within the Wildland Urban Interface. Forty-eight volunteer fire

departments received funds primarily to upgrade rural water supply. Installing dry hydrants extend that water supply for fire suppression, reduce hazard ratings and allow homeowners to purchase fire insurance.

- **Economic Action Programs:** The Maryland Forest Service began marketing the results of the study, "Economic Impacts of Forest Products in Maryland," through publications, public and legislative outreach, and education. Maryland produced a Sustainable Forestry Initiative™ brochure to tie timber harvesting in the state to the health of the Chesapeake Bay.

Fire Preparedness and Facilities

Maintain a cost effective level of preparedness in firefighting and prevention

- **Preparedness Resources**
 - Department of the Interior will have an increase of 6 firefighting personnel and 3 engines.

Rehabilitation and Restoration

Rehabilitate fire damaged wildlands and restore ecosystem

- Rehabilitation and Restoration program consists of
 1. Immediate actions to reduce threats to public safety, property and natural and cultural resources, and
 2. Long-term actions to help restore healthy ecosystems and replace infrastructure damaged by fire.
- DOI funding will cover ecological stabilization, reforestation (seeding, cultural protection invasive species, contour tree felling, monitoring);
- USDA Forest Service funding will be used to improve overall watershed condition and restoring severely burned forests and rangelands. Projects include reforestation, watershed restoration, road and trail rehabilitation, fish and wildlife habitat restoration, planting and seeding and preventing invasive plants.

Hazardous Fuel Reduction

Invest in projects to reduce fire risk with focused effort in wildland urban interface areas.

- Approximately 7,970 acres are planned for Hazardous Fuels treatment by Federal agencies, an estimated 460 acres will be treated in the Wildland Urban Interface.
- An estimated \$161,000 will be spent on hazardous fuels treatment work.

Community Assistance

Work with communities to reduce the risks of catastrophic fire

- 8 rural/volunteer fire departments will receive assistance from DOI.
- State Fire Assistance (FS): Estimated funding - \$702,116.
- Volunteer Fire Assistance Program (FS): Estimated funding - \$150,957.

Accountability

Establish and maintain a high level of accountability including oversight reviews, progress tracking and performance monitoring

- DOI and Forest Service are developing a uniform set of performance measures necessary to assess program effectiveness these measures will be tracked through a common electronic database by the end of the FY02.
- DOI and Forest Service have developed a uniform process and timeline to identify and complete planning on fuels treatment projects.
- A DOI and Forest Service contracting review has been completed and actions will be initiated to increase the level of contracts for fuels hazard reduction work.
