## FY 2003 Programs in New York

The USDA Forest Service (FS) and the Department of the Interior (DOI) agencies are in the third year of successful implementation of National Fire Plan (NFP) activities. The NFP was developed in August 2000, following a landmark wildland fire season, with the intent of actively responding to severe wildland fires and their impacts to communities while assuring sufficient firefighting capacity for the future. The NFP addresses five key points: Firefighting, Rehabilitation, Hazardous Fuels Reduction, Community Assistance, and Accountability.

(dollars displayed in thousands)

USDA / DOI	Actual 2002	**Estimated 2003
<b>Preparedness</b>	115	75
<b>Operations</b>		
<b>Suppression*</b>		
Hazardous Fuel	54	143
Rehabilitation	0	
Fire Facilities	0	
Research and Development	0	
Joint Fire Sciences	0	
Forest Health Management	0	
State Fire Assistance	346	922
Volunteer Fire Assistance /Rural Fire Assistance	371	938
Economic Action Program	0	
<b>TOTAL</b>	<b>886</b>	<b>2,078</b>

\* Suppression costs for New York totaled \$53,000 in 2002.

\*\* Actual funding will be displayed in the 2003 Annual Performance Report.

## Program Highlights

- State Fire Assistance and Volunteer Fire Assistance has contributed greatly to continued training for firefighters in the State of New York. Additional funding has also contributed to enhanced fire prevention programs, additional firefighting tools, water handling equipment and supplies, and personal protective equipment.
- Additional funding in FY 2003 will allow for the acquisition of 3 remote area weather stations to support prescribed fire operations and.

## Fire Preparedness and Facilities

- Preparedness Resources  
    # Department of the Interior will have 5 firefighting personnel and 1 engine.

## Rehabilitation

- Rehabilitation consists of 1) immediate actions to reduce threats to public safety, property and natural and cultural resources, and 2) long-term actions to help restore healthy ecosystems and replace infrastructure damaged by fire.
- DOI funding will cover ecological stabilization, reforestation (seeding, cultural protection from invasive species, contour tree felling, monitoring).
- USDA Forest Service funding will be used to improve overall watershed condition and restore severely burned forests and rangelands. Projects include reforestation, watershed restoration, road and trail rehabilitation, fish and wildlife habitat restoration, planting and seeding and preventing invasive plants

## Hazardous Fuels Reduction

- Approximately 400 acres are planned for hazardous fuels treatment by federal agencies; an estimated 43 acres will be treated in the wildland urban interface.
- An estimated \$143,000 will be spent on hazardous fuels treatment work.

## Community Assistance

States are focusing funding on increasing wildland fire response capacity by enhancing their level of fire preparedness, training wildland firefighters, purchasing personal protective equipment, conducting fire education and prevention activities including Firewise projects, implementing hazard mitigation projects addressing fuel reduction and installation of dry hydrants, and fire planning projects assessing communities at risk.

- Rural Fire Assistance (DOI) – Estimated funding – \$13,000  
# 2 rural/volunteer fire departments will receive assistance DOI.
- State Fire Assistance (FS) – Estimated funding – \$922,000
- Volunteer Fire Assistance Program (FS) – Estimated funding – \$925,000

## Accountability

- DOI and Forest Service have developed a uniform set of performance measures to assess program effectiveness for FY 2003 and FY 2004 program measurement.
- DOI and USDA Forest Service, with input from the National Association of State Foresters, developed action plans for nearly all of the 23 tasks in the Implementation Plan for the 10-Year Comprehensive Strategy. The State Foresters and their partners are continuing to develop field guidance for fuels reduction projects.
- DOI and USDA Forest Service developed the National Fire Plan Operations and Reporting System (NFPORS), a common data collection and reporting system for gathering project plans and accomplishments.
